Features and Benefits:

- Locking Hex feature allows for rapid change of hex bits when doing drilling and driving operations without tightening the chuck.
- A snap ball in Hex Mount which provide max 9 lbf retention force.
- Chuck can still be used as normal with round shank bits.
- For larger diameter drill bits (i.e. 1.0" – 1.5" spade bits) where tightening the chuck would be recommended, Locking Hex feature would properly align jaws to hex flats on the drill shank.
